👤 SUMMARY

Motivated IT engineer with a keen interest in Java programming, Software Development Life Cycle (SDLC), and web development. Seeking an opportunity to contribute to an organization, harness my skills, and gain hands-on experience in software development processes. Eager to learn and grow within a dynamic and challenging environment.

💼 EXPERIENCE

CodSoft
Internship
Aug 2023 – Sep 2023

- Contributed to the development of Java applications and software solutions under the guidance of senior Java developers.
- Participated in the full software development lifecycle, including requirements gathering, design, development, testing, and deployment..
- Assisted in troubleshooting and debugging code, resolving software defects, and optimizing application performance.
- Collaborated with team members to review code, provide feedback, and ensure adherence to coding standards and best practices.

📑 CERTIFICATES

The Web Developer Bootcamp | Udemy
Learned Web Development from Scratch - Frontend & Backend (Beginner to Advanced)

Java Bootcamp | Udemy
Learned basic to advanced java concepts needed to pursue Web Development, Android Development and Automation.

SQL For Data Science | UC Davis
Worked on SQLite, which included running SQL commands and running real time business problem.

📁 PROJECTS

Social Media Website
Developed a full-stack social media platform using the **MERN stack** (MongoDB, Express.js, React, Node.js). Designed and implemented scalable backend services with RESTful APIs, and created a dynamic, responsive front-end interface.

ATM interface
Designed and developed an intuitive ATM Interface using **Java**, making transactions and banking operations seamless for users. Building the ATM Interface required applying problem-solving skills, ensuring a secure and efficient user experience.
