Lead QA

Summary

I have over 7.5 years of experience in software testing specializing in both automation and manual testing. My proficiency in Backend API testing, end-to-end testing at various product layers, and efficient debugging, bug reporting, and tracking via JIRA, manifests my ability to work adeptly in dynamic environments. I'm skilled in SQL and Mongo Database Queries and have substantial experience in Web Automation using Selenium and API Automation using Rest Assured and Cucumber.

Skills Summary

• API Automation • Web Automation • Java • Github • Unix Commands • Selenium Webdriver • Cucumber • TestNG • SQL
• API Testing • Postman • Rest Assured • Debugging • Web Testing • Bug Reporting • Redis, Mongo • Jmeter • JIRA

Work Experience

Sep 21 - Present

July 18 - Aug 21

SDET-3

Mobikwik, Gurgaon

Backend and Client (android) Testing of all lending projects (Credit Line, Instant Loan, Pay-later, etc.)

- Design and documented detailed test cases to cover all test levels, including positive, and negative, user compatibility test cases, etc.
- Executed all test cases, detecting bugs, and classifying them based on severity/priority post-acceptance test case execution.
- Working with PMs for gathering and finalizing Requirements.
- Working with developers for finalizing implementation and understating of requirements.
- Taking care of the end-to-end release process of any feature on production from Testing, Release, and Post- production Monitoring.
- API and Client (android) testing for all major payments-related projects such as Credit Line, Instant Loan, Pay- later, etc.
- Developed Automation scripts using Rest Assured for Lending Project.
- Modified/Update Rest Assured API Automation Framework in Java which has been used across Company.

Jan 16 - July 18

Senior SDET

PayU Payments, Gurgaon

Worked as Sr. SDET in various projects under Banking Integration and Payment Flow like Integration with PayU of UPI, Bharat QR, NetBankings, Challan Payments, HDFC Payment Gateway, LazyPay, PhonePe Wallet, Sodexo, and many more.

- Design and documented detailed test cases to cover all levels of test, including positive, negative, user compatibility test cases, etc., and performed Sanity, Smoke, Integration, Security, System, WhiteBox, BlackBox, Regression and other testing methods in various products related to the payment domain.
- Timely logging of all activities and test cases in JIRA and TestLink respectively.
- Support developers in validating and debugging analytics issues throughout the implementation process. API testing with Postman and other tools.
- Working in synchronization with other teams in order to test all the commonly affected areas. Maintaining test environment and automation framework and machines for testing of all the products.
- Ownership of complete features from the initial phase to deployment and maintenance phase.
- Analyze automation test results to ensure functionality and recommend appropriate action. Ownership of the deployment process for my tested features with post live monitoring.
- Working with the product and development team and track all problem reports to closure.

- Giving demo sessions for new features/modifications being implemented.
- Working in close association with integration and support teams to provide a quick and hassle-free resolution for customer-facing issues

Education

2012 - 2016

B.Tech. - Computer Engineering

YMCA University, Faridabad

CGPA : 8.02
