## WORK EXPERIENCE

June 2022 - July 2023

SDE-1 at Pinch

As a web developer, I have had the privilege to work on a diverse range of projects, each of which has allowed me to showcase my skills and passion for crafting exceptional web solutions.

**Care Crew Customer-facing Project:** In this role, I was responsible for building the Care Crew website from the ground up, utilizing React, Material UI, and Firebase. My focus on creating an intuitive user experience was evident in every detail of this project.

**PinchFit Meal Plan Project:** Another significant project in my portfolio is the PinchFit Meal Plan website. I played a pivotal role in developing this site entirely from scratch using React, Material UI, and Firebase, further reinforcing my commitment to delivering visually appealing and highly functional web applications.

**Vista CRM:** Additionally, I demonstrated my design expertise by leading the creation of all UI elements for a CRM system. Using React, Redux, and Material UI, I seamlessly blended aesthetics with functionality, ensuring an exceptional user experience.

**CORE Bill Management Project:** Within this project, I assumed responsibility for the user interface, where I successfully created a seamless and engaging interface. This contribution underscored my dedication to delivering user-centric solutions.

August 2021 - June 2022

Full Stack Web Developer at Masai School

I have spent 10 months immersed in the comprehensive Full Stack Web Development program and solved more than 300 DSA problems at Masai School, honing my skills in both front-end and back-end development.

## PROJECTS

**CARE CREW:-** A customer-facing web Application

**Features:** **1-**Seamless Callback Form: Connect with ease. **2-**Intelligent Chatbot Integration: Elevate user engagement. **3-**Dynamic Blog Section: Powered by Sanity.js. **4-**Effortless Email Communication: Empowering customers to connect effortlessly. **5-**Feature-Rich Blog Page, powered by Sanity.js. **6-**Admin page

**Areas of responsibility:** **1-**I Crafted an exceptional UI. **2-**Streamlined email functionality with SMTP.js, enhancing user communication and experience. **3-**Incorporated a user-friendly callback form. **4-**Introduced a dynamic blog page backed by Sanity.js. **5-**Seamlessly integrated an intelligent chatbot powered by tidio.

**Tech Stacks:** React | Javascript | Sanity js | Material UI | Firebase | Context API

**PINCHFIT:-** A Meal Plan web Application

**Features:** **1-**Streamlined Social Sign-in, Sign-up, and Google Authentication. **2-**User-Friendly 'Help Us Get to Know You' Form. **3-**Interactive Weekly Meal Calendar. **4-**Seamless Multi-Family Member Management Under a Single Login.

**Areas of responsibility:** **1-**I've masterminded this project from the ground up, weaving together an array of sophisticated features. **2-**Robust Social and Google Authentication for seamless user access. **3-**A comprehensive, data-driven form with multiple input fields, dynamically tailoring meal recommendations to each user's preferences. **4-**Multi-family member management under one login, allowing users to curate meal plans for their entire household. **5-**A user-friendly one-week meal calendar, empowering users to effortlessly craft and modify their weekly meal plans, with the option for manual adjustments.

**Tech Stacks:** React | Javascript | Firebase | Material UI
