JOB OBJECTIVE

Aspiring performance tester with a strong foundation in JMETER and load generator tools, seeking a challenging role to leverage my problem-solving skills and passion for creating innovative solutions. Dedicated to contributing to a dynamic team and driving excellence in testing.

CORE COMPETENCIES

- ➢ Load Runner
- ➢ JMeter
- ➢ Dynatrace
- ➢ AppDynamics
- ➢ Grafana
- ➢ Splunk
- ➢ Counters

SOFT SKILLS

- ➢ Collaborator
- ➢ Communicator
- ➢ Decisive
- ➢ Analytical
- ➢ Team-oriented

PROFILE SUMMARY

- Professional work experience in Performance Testing since Sep- 2020.

- Professional work experience in Performance Testing using industry-leading tools like **Load Runner, J meter, Performance Centre, Soap-UI**

- Area of expertise includes Scripting, Workload design, Test Execution, Result Analysis, and Reporting.

- Worked on **Web-HTTP/HTML, SAP GUI, Web services, REST (SOAP/XML),TruClient**.

- Have worked on POC for Performance Testing tools

- Good understanding of the Performance Testing Life-cycle, Techniques, and Methodologies.

- Experienced in exploring tools and introducing tools involved in monitoring measuring, debugging, coding, and tuning for improved product performance.

- Industry / Domain: Healthcare, Finance and E-commerce.

- Dynamic Team player possesses strong interpersonal and communication skills.

- Ability to learn quickly, handle multiple assignments and perform well in fast-paced and time-sensitive environments.

Project #1

Title : Autogrill
Role : Analyst
Tools : Dynatrace, Load runner
Client : Barclays

Description:

Roles &Responsibilities:

- Handling the modules and responsible for end-to-end completion from the Requirement stage to Reporting.
- Preparation of Performance Test Scripts utilizing various protocols supported by JMeter WEB request.
- Applying transaction names, Assertions, Parameterization, and correlation for scripts in JMeter.
- Executing scripts in JMeter for different set of Vusers.
- Performing Dry runs, Baseline and Soak tests.
- Analyzing Test Results and Identifying, investigating and recommending on Performance Bottleneck

EDUCATION

2015
Bachelors in Computer Statistics |
Satavahana University | Karimnagar

WORK EXPERIENCE

FEB-2020 to At-Present

|SPARKVIZ TECHNOLOHIES
.PVT.LTD, |
Bangalore

,

- Preparing script flow documents for future purpose.

Project #2

- **Title** : Intelligent Protocoling (Health care).
- **Role** : Analyst
- **Tools** : Load Runner, Performance center and App-dynamics.
- **Client** : Global optum

Description:

IP App provides scanner recommendations based on LMWA by connecting with micro services in the Edge Box, which retrieves patient data from EMR via HL7/DICOM and sends protocol recommendations to the scanner.

Roles & Responsibilities:

- Involved in created Test Approach document and Work load model document.
- Coordinated with the team to creating scripts for all the CBT's.
- Handling the challenges faced while running the scripts with multiple users
- Checking the environment availability, identifying the test data required to implement tests.
- Involved in designing of the report by observing the related metrics and graphs analyzing the results like Monitoring Server Logs and Server Statistics.
- Involved in preparing High level summary reports and creating DT dashboards to analyze and providing overview to the customer.
- Involved in creating the frameworks to automate the scripts functionality to reuse the common code.
- Involved in preparing User guide documents for every change in the application functionality.
- Experienced in preparing risk assessment document for forecasting the future release build deployments.
- Had involved in multiple applications performance scripts validation under Hydro one project.
- Prepared prerequisites document to follow the all the necessary data creation scripts to run before the load test.

Projcect #3

Title : RTX (Raytheon Technologies)
Role : Analyst
Tools : JMeter, HTTP Request, Grafana
Client : Intel

Description:

Raytheon Technologies (RTX) is a leading aerospace and defense company specializing in aviation, cybersecurity, and defense solutions.It operates through Collins Aerospace, Pratt & Whitney, and Raytheon, serving global military and commercial markets..

Roles & Responsibilities:

- Creating scripts for the identified scenarios.
- Customizing the scripts with standards
- Handling the challenges faced while running the scripts with multiple users
- Checking the environment availability, identifying the test data required to implement tests.
- Involved in designing of the report by observing the related metrics and graphs analyzing the results like Monitoring Server Logs and Server Statistics.
- Preparing a valuable report which will be useful to the client.
- Involved in preparing High level summary reports and creating DT dashboards to analyze and providing overview to the customer.
- Involved in creating the frameworks to automate the scripts functionality to reuse the common code.
- Involved in preparing User guide documents for every change in the application functionality.

I hereby declare that the above mentioned details are true to the best of my Knowledge and belief.

DECLARATION
