07/2015 - 10/2020   *Ahmednagar, Maharashtra*
Gread
- Second Class

TECHNICAL SKILLS

Java   JDBC   JSP   Servlet   Spring Framework   Springboot   RESTful API   Microservices   Hibernate   Junit   Mockito   Mysql   Mongodb   HTML   CSS   Javascript   Git   Jira   Maven

CURRENT PROJECTS

Assessment Hub Platform (11/2022 - Present)
- **TECHNOLOGY STACK**: Java 8, Spring Framework, Springboot, RESTful API, Microservices Architecture, STS IDE, JUnit , Mockito, HTML, CSS, JavaScript, GitHub, JIRA, MySQL, MongoDB.
- **DESCRIPTION:** The Assessment Hub Platform is designed to facilitate the management of player scores, question types, question allocation, and player observation within gaming environments. It encompasses the storage and retrieval of question-answer data while players are engaged in the game.
- **RESPONSIBILITIES:** Develop and implement best practices and efficient code utilizing Core Java and Spring Boot. Evaluate and select appropriate libraries and tools to optimize project efficiency. Ensure the maintenance of high-quality, testable code throughout the development process. Meet project deliverables within agreed scope and timelines.
- **ROLE:** Java Developer **DOMAIN:** Education Technology

HAS for XPRO (08/2021 - 09/2022)
- **TECHNOLOGY STACK:-** Java 8, Spring Framework, Spring Boot, RESTful API, Microservices Architecture, IntelliJ IDEA, JUnit, Mockito, HTML , CSS, JavaScript, GitHub, JIRA , Oracle
- **Project Description:** The HealthCare Appointment Scheduler is a comprehensive system designed to facilitate the scheduling of appointments for doctor clinics. It employs a robust architecture built on Java 8, utilizing Spring Framework for dependency injection and Spring Boot for rapid development. The system exposes RESTful APIs for seamless integration with various client applications. Microservices architecture is adopted to ensure scalability and maintainability.
- **Project Responsibilities:** Developing RESTful APIs for communication between services. Integrating with MySQL and Oracle databases for data storage and retrieval. Implementing authentication and authorization mechanisms for secure access. Creating responsive and user-friendly frontend interfaces using Angular. Conducting unit tests using JUnit and Mockito to ensure code quality. Collaborating with team members to ensure smooth integration of modules. Providing technical support and troubleshooting assistance during development and deployment phases.
- **ROLE:** Java Developer **DOMAIN:** Healthcare
