## WORK EXPERIENCE

### Cloud Intern
**OpenText**

📅 September 2023 – Current         📍 Hyderabad

- As an intern, I play a key role in monitoring URL health through Zabbix and Grafana. I configure Zabbix to collect and analyze real-time data for timely issue identification. Integrating Zabbix with Grafana, I visually represent URL performance metrics.

### Research and Development Intern
**Samsung Prism**

📅 July 2021 – March 2022         📍 Remote

- Conducted research on AI Low-Code Tools, developed an image classification application with a user-friendly interface and drag-and-drop customization, offering real-time performance monitoring through metrics.

### Web Developer Intern
**Suven Consultants Technology Pvt. Ltd.**

📅 June 2021 – July 2021         📍 Remote

- Developed three dynamic projects (Basic Calculator App, User Profile App, E-Commerce Web App) using Angular.
- Gained hands-on experience in web development and Angular framework.

## PROJECTS

### Education Management System

- Designed and developed a dynamic web application using JDBC, JSP, and Servlets.
- Purpose-built to meet the specific educational needs and seamlessly manage data related to students, courses, and teachers.

### Inventory Management System

- Designed and developed a web application using Django.
- Purpose-built as an integrated Inventory with e-commerce capabilities, enabling user registration, product purchases, and order tracking. Suppliers manage listings, while admins oversee orders and database for customer satisfaction.

### Flight Management System

- Designed and developed a web application using Spring boot and angular.
- Purpose-built to provide a seamless experience for users to search, book, and manage flights while enabling administrators to efficiently manage flight data.
