Bachelor of Computer Applications (BCA)

Graduation From Delhi University   **2022**
Bachelor of Arts (B.A)

PROJECTS

VERDICAL ERP

"Verdical Project: Created an ERP accounting software similar to Tally using Next.js for smooth performance, Tailwind CSS for clean styling, and user-friendly features. Tailored for efficient financial management, delivering a streamlined experience."

ARCHIKA DIDI

"Archika Didi Project: Crafted a dynamic MERN stack application with an admin panel feature using Redux for state management, RESTful APIs for backend functionality, and Bootstrap for a modern look. Incorporated Material UI for enhanced styling in the admin panel and utilized Axios for seamless API data fetching, ensuring a polished and responsive user experience."

Jyoti Hospital

Developed a Doctor Appointment Booking Website using React.js and Express with Redux for efficient state management. The platform enables users to view detailed doctor profiles, book appointments, and securely pay appointment fees. Doctors can log in to manage their schedules, view daily appointments, and modify availability by adding or canceling appointments. This project enhances appointment accessibility for patients and simplifies scheduling for doctors, creating a streamlined healthcare booking experience.

Himachali Vivah

A Flutter-based matrimonial app for the Himachali community, built with **BLoC architecture** for efficient state management. Features include profile creation, match browsing, secure authentication, and advanced search filters.
