PROJECT

Hotel Website Page [🔗](#)

- Engineered a responsive hotel website using HTML5, CSS3, JavaScript (ES6), and Bootstrap. Structured the layout with semantic elements, including the homepage, room listings, booking forms, and contact details.
- Implemented advanced CSS techniques to enhance visual aesthetics, typography management, and adaptive design.

Photography Website Page [🔗](#)

- Developed a dynamic and responsive photography website using HTML5, CSS3, JavaScript (ES6), and Bootstrap.
- Designed the site structure with semantic elements, including headers, navigation bars, and image grids.
- Enhanced visual aesthetics using advanced CSS techniques for layout, typography, and color schemes.

Ecommerce Website (ShopMe) [🔗](#)

- Developed a shopping website using React.js for the frontend. Used Tailwind CSS for styling and Vite.js as the build tool for faster development.
- Created reusable components like Navbar, Footer, Hero, Banner, and Products to ensure modularity.
- Implemented sections such as Testimonials, Top Products, and a Subscription feature for user engagement. Designed an interactive layout with popups and banners for promotions.

Customer Ticketing System

- Developed a **Customer Ticketing System** using PHP to streamline issue tracking and resolution processes, featuring automated ticket creation, categorization, and real-time status updates.
- Leveraged PHP with MySQL for backend development and implemented REST APIs for seamless integration with existing systems.
