Projects

Bookmark Landing Page Using Html ,CSS and ReactJS
Tech Stack and Features required for the project: Users can be able to do the following:

- View the site's optimal layout based on the device's screen size.
- All interactive elements on the page have hover states.
- When you submit the newsletter form, you'll get an error message if: The input field is currently empty.
  The email address is incorrectly formatted.

Volume Controlled by Hand Gesture | Python

- Project Objective: Hand gesture-controlled volume adjustment system using computer vision and machine learning
- Function: Integrated with audio devices for seamless volume modulation through gestures while ensuring accuracy and user-friendly feedback mechanisms.
- tech Stack: LIBRARIES used OpenCV, MEDIATIZE, NumPy,MATH, PAYCAW

Heart Disease Prediction | ML

- Project Objective: To Develop a heart disease prediction model.
- Tech used: Developed using logistic regression in Python with NumPy and Pandas.
- Interface: Cleaned and preprocessed health data, implemented model evaluation, and fine-tuned hyperparameters

Skills

C, C++, BASIC PYTHON, HTML, CSS, Bootstrap, JavaScript, React.js, DATA STRUCTURE AND ALGORITHM, Operating Systems, Communication skills, Microsoft excel, Microsoft word, OPPS, DBMS, Computer Skills

Certificates

C++ & Datastructures|CETPA, NETFLIX CLONE using HTML &CSS|ShapeAi , Workshop On Machine Learning |ShapeAi, Front End Development | Freecodecamp

ACHIEVEMENTS

Solved 400++ Question on Leetcode and Coding Ninjas , Participated in Q2 present FINTIX, Class Represetive , Runner in Flipkartthon
