Results-driven Engineer proficient in JavaScript, HTML, CSS, Java, Python, React js, C, and C++, with a strong foundation in data structures and problem-solving. Effective communicator with a passion for creating engaging web experiences

PROJECTS

Gemini Clone

Using React JS, CSS & JS only

- Developed a clone of the Gemini cryptocurrency platform using React.js, CSS, and JavaScript. The project emulates the core functionalities and user interface of the original Gemini platform, providing a responsive and interactive user experience.
- .Deployment: Successfully deployed the project on Vercel for easy access and demonstration.
- User-friendly interface replicating the Gemini exchange..
- Implement knowledge of API
