---

## OBJECTIVE

Detail-oriented and innovative Front-End Developer with a strong educational foundation in Computer Science (BSc. Computer Science Hons.) and advanced expertise from a Master's in Computer Application. Seeking to leverage technical skills in HTML, CSS, JavaScript, React and modern frameworks to create dynamic, user-friendly web applications. Eager to contribute to a forward-thinking tech company with a collaborative environment and opportunities for growth.

---

## LIVE PROJECTS

- 1. BookSwap (Online Bookstore)** – Designed and developed "BookSwap," an online bookstore platform enabling users to buy and sell second-hand books, with integrated chatbot functionality for communication between users. Leveraged HTML, CSS, JavaScript for frontend development, and Java with Spring Boot for backend development, utilizing MySQL for database management. Future enhancements include audiobook support and map integration for expanded functionality.
  - **Technology used:** HTML5, CSS3, JavaScript, Java, Spring Boot and MySQL
- 2. Sticky Notes** – Developed an interactive sticky note application using HTML, CSS, and JavaScript, enabling users to add, delete, and customize colorful notes on the screen. Demonstrated proficiency in frontend development, UI design, and user interaction. Implemented JavaScript functionalities to enable users to add, delete, and manipulate sticky notes dynamically on the screen, enhancing user interaction and productivity.
  - **Technology used:** HTML5, CSS3, JavaScript (DOM Manipulation)
- 3. Amazon Clone** - Developed a full-fledged Amazon clone to replicate the core functionalities and user interface of the popular e-commerce platform. Leveraged modern web development techniques to create a responsive and visually appealing website.
  - **Technology used:** HTML5, CSS3
