Institute of Management and Technology, Uttarakhand

Higher Secondary (12th Grade) 2018

Krishna Public Collegiate, Kashipur
Uttarakhand

KEY SKILLS

- Front-end: HTML, CSS, JavaScript, React.Js, React Hooks, React Router, Redux, DOM Manipulation
- Back-end: NodeJs, MongoDB
- Tools: GIT, Render, Netlify, Postman, VS code
- Framework: Bootstrap, Tailwind

PROFESSIONAL EXPERIENCE

Internship Experience

June 2024- September 2024

Full Stack Developer Intern

AVLLO Pvt Ltd.

- Collaborated on Full-Stack Projects: Assisted in developing and deploying web applications that integrated both front-end and back-end components.
- Front-End Development: Utilized React, HTML, CSS, and JavaScript to build responsive and user-friendly web interfaces.
- Back-End Development: Worked with Node.js, Express, and REST APIs to develop and maintain server-side logic, ensuring smooth data flow between front-end and back-end.

PROJECTS COMPLETED

1. E-Commerce App (React.js, Express.js, MongoDB)

- Created an end-to-end e-commerce application using React.js for the front-end, Express.js for the back-end, and MongoDB for the database. Implemented features such as product browsing, shopping cart management, and secure checkout processes. Ensured a smooth and user-friendly experience throughout the online purchasing journey.
- <https://timely-sunburst-2b7ddc.netlify.app/>

2. UDEMY CLONE (MERN STACK)

- Developed a comprehensive website clone replicating the core functionalities of the popular Udemmy platform. Leveraged the MERN stack (MongoDB, Express.js, React.js, Node.js) to build a robust and scalable application. Implemented secure authentication, responsive design, and seamless data handling for an optimal user experience.
- <https://ornate-fudge-8600b5.netlify.app/>

3. Blog App (React.js, Node.js, Express.js, MongoDB)

- Created a dynamic blog app enabling users to create, publish, and manage posts, with authentication, CRUD operations, and responsive design.
