EDUCATION

BACHELOR OF COMPUTER APPLICATIONS

Swami Rama Himalayan
University
2022-2025

BACHERLOR OF ARTS

Shri Babu Kaliram
Rakesh Government
Degree College
Churiyala Haridwar
Uttarakhand

2019-2022

10TH & 12TH

Smt Pushpa Vadera
Saraswati Vidya Mandir
Inter College
2017-2019

SKILLS

C PROGRAMING , HTML

CSS , TAILWIND

JAVASCRIPT, REACT

NODE .JS , EXPRESS.JS,

MONGODB,GIT,GITHUB

SUMMARY

Hi, my name is Durga sahu, currently pursuing Bachelor of Computer Applications from Swami Rama Himalayan university, Dehradun. It's been almost a year since I started learning Web development and I have and still learning a lot of FrontEnd and backend technologies . And now I'm looking forward to put the knowledge I have to work and start my Career in the Field .

PROJECTS

UBER-CLONE

Developed a full-stack ride-booking platform using React.js, Node.js, and MongoDB, where rides start after OTP-based user authentication for secure access. Integrated Socket.IO to notify captains when a ride is created and manage real-time communication for starting and ending rides. The app calculates dynamic fare based on the distance between the user's and captain's locations using latitude and longitude data. Utilized OpenLayers for live location tracking, dynamically displaying user and captain positions on the map. Implemented smooth animations with GSAP to enhance the user experience. React Context API was used for global state management, and MongoDB stores user and ride data. Static map integration provides clear location representation.

ECOMMERCE-SITE WITH ADMIN-PANEL

Developed a full-stack e-commerce platform with React, Redux (Redux Thunk), Node.js, Express, and MongoDB. Included an admin panel for managing products, orders, and customers. Features:

- Customer: Browse products, add to cart, pay with Razorpay, track orders, and post reviews.
- Admin: Manage products (with Cloudinary image uploads), orders, and customer details.

Technologies:

React, Redux (Thunk), Node.js, Express, MongoDB, Razorpay, Cloudinary.

JOB-PORTAL

For Job Seekers :Create and update profiles, apply for jobs with filters (location, salary), and manage applications.

For Recruiters : Create company profiles, post jobs, update statuses, and manage applications easily.

Built with React.js, Redux Toolkit (for state management), Redux Persist (to retain data), ShadCN, and Cloudinary (for file management), YourJobPortal ensures a smooth, fast, and secure experience for all

OTHER : BASIC CHATAPP, TODO-LISTS,
