PROJECTS

Implemented real-time chat functionality across various projects, enabling seamless communication between users and enhancing customer engagement and support.

Integrated secure payment gateways, ensuring smooth and reliable transactions for users across different e-commerce platforms.

Deployed the application to production environments, utilizing Docker containers and AWS cloud services for scalable and reliable hosting infrastructure.

Developed projects from scratch, using a combination of MongoDB, Express.js, React.js, and Node.js (MERN stack). This included planning, coding, and launching the projects.

Contributed to microservices projects, gaining valuable experience in scalable architecture design, alongside proficiency in GraphQL implementation.
