I'm a recent graduate who is highly adaptable
and motivated to learn new things. I'm looking for an
opportunity where i can utilize my skills and continue
to grow professionally.

PROJECTS

1. CHATBOT CUM VOICE ASSISTANT Link

A chatbot cum voice assistant developed using python.
It can perform tasks like play songs, search on Google,
speak results found from Wikipedia, tell date and time and
open some applications.

Designed and implemented chatbot application in 4-person
team over 10-weeks. I worked on analysis and coding.

We got the highest rating for our project out of all the teams
because it has some advanced features which are helpful in
the field of education.

2. QUIZ APPLICATION Link

A quiz application is a desktop based application developed
using Java Swing and Abstract Window Toolkit (AWT).

This quiz has a total of 10 questions and each question has 15
seconds to answer. It also provides one lifeline: "50-50" which
can be used once in a game.

My focus was on the backend also i was responsible for
assigning responsibilities and tasks to team members.

EDUCATION

B.TECH, Information Technology	2018 - 2022
Greater Noida Institute of Technology	
12TH	2017 - 2018
Nutan Vidya Mandir
