PROJECTS

HOSPITAL MANAGEMENT SYSTEM | HTML, CSS, JavaScript, Bootstrap, PHP, MySQL

- The portal serves as a convenient platform for patients to easily schedule appointments with our healthcare professionals.
- Additionally, hospitals can leverage this portal to effectively organize and maintain comprehensive records of both doctors and patients.
- This tool proves invaluable for doctors, providing them with quick access to detailed patient information, streamlining their workflow.

HOUSEKEEPERNECE | HTML, CSS, JavaScript, Bootstrap, PHP, MySQL

- “Housekeeping” serves as a user-friendly portal through which users can conveniently submit cleaning- related complaints.
- This primary goal of “HOUSEKEEPING” is to digitize and streamline cleaning maintenance processes, efficiently addressing users cleaning concerns.
- Through automation and streamlined communication, Housekeeping contributes to a hassle-free and comfortable hostel living experience.
