SUMMARY

With 2.2 years as a Software Engineer, I've shown my knack for setting up and keeping up budget-friendly ways to create and test systems. I'm on the lookout for a chance to grow in Frontend development using React.js. I'm excited to take on trickier challenges and keep uncovering methods to make users' lives even smoother.

SKILLS

Technical Skills: HTML5, CSS3, SCSS, JavaScript, ECMAScript, React.Js, jQuery, Redux.Js, Jest, React Testing Library, TailWind CSS, Bootstrap, TypeScript, Accessibility (A11y), JSON, JWT, REST API, Styled components, GIT, Webpack, JIRA

EXPERIENCE

Frontend Developer   Aug 2022 - Present
Delta4 Infotech Pvt. Ltd.

- Entrusted with the UI Piece of the project. (clean code, review, technical discussion, etc..)
- Tasked with browser compatibility and responsiveness (Mobile to Large desktop)
- Optimised components, and performed testing and debugging application codes for continuous improvement, smooth execution and stable online presence.
- Mentored 3+ interns on JavaScript to expand JavaScript skillset in the team.
- Migrated a multi-page user experience into a single-page application which improved web app performance by 10 percentage.
- Identified and fixed bugs in web applications which enhanced the application performance by 20 percentage.
- Gathering detailed Requirements from the Marketing team.
- Involved in high-level technical discussions with architects

Frontend Developer   Dec 2021 - Jun 2022
AR Technity Pvt. Ltd.

- Understanding the requirement, creating a design document for the new features, and adapting the rapid changes in requirements Supported clients with bugs and change requests as required.
- Have sound knowledge in accessibility compliance as per WCAG standards using tools like NVDA, WAVE
- Developed multiple dynamic and cross-browser compatible POCs using HTML5, CSS3, and JavaScript.
- Implemented the Style, look and feel of the web page with SASS that extends CSS with dynamic behaviour such as variable, mixing, operations and functions

WebApp Developer   July 2021 - Dec 2021
EdSky Learning LLP

- Designed and developed several web interfaces, graphics, and layouts incorporating responsive designs via core media queries and bootstrap.
- Identified and fixed bugs in web applications which enhanced the application performance by 20 perc..
- Worked in using React JS components, Forms, Events, Keys, Router, Animations and State management concepts.
- Implemented the Style, look and feel of the web page with SCSS that extends CSS with dynamic behaviour such as variable, mixing, operations and functions

PROJECTS

Venturecraft Venturecraft is a robust platform, meticulously crafted with React.js at its core, aimed at revolutionizing the way visionary business concepts are translated into persuasive narratives. Our platform is engineered to cater to the demands of even the most discerning and critical audiences. We have honed our expertise in assisting startups in securing crucial funding and support by employing a repertoire of tried-and-true commercialization strategies and crafting captivating investor presentations.

Tech Stack ReactJs, Next.Js, TypeScript, TailWind CSS, Figma, Hooks, JSX, JavaScript, Styled-components

Prank Caller This is a cutting-edge React.js project that serves as an interactive prank call platform. Built with React.js at its core, it offers a seamless and dynamic user interface for users to explore and select from a variety of prank call scenarios. Leveraging advanced state management and responsive design techniques, it ensures top-tier performance and cross-device compatibility.

Explore Talent It is a cutting-edge React.js web application facilitating seamless connections between talents and casting professionals. Pioneering modern technologies, it has established the world's largest talent network with a staggering 11 million users. Key features include a user-friendly interface, comprehensive casting calls, captivating talent profiles, a dedicated section for children, and spotlighting featured talents, all contributing to an immersive talent discovery experience.

Tech Stack ReactJs, Next.Js, JavaScript, Styled-components, JWT, Hooks, ES6,

ROLAND Roland is an elegant React.js-based web application designed to showcase the exquisite craftsmanship of a goldsmith. It serves as a digital haven for jewelry enthusiasts, featuring stunning lookbooks, an extensive jewelry archive, and the latest news in the world of jewelry design. This project encapsulates the essence of artistry and aesthetics.

Tech Stack ReactJs, ES6, JSX, CSS

OpalHarborThis is about making an online store using React and Redux, which are technologies that help build websites. The cool thing is, people can log in using their Google accounts, and when they want to buy something, a special tool called StripeAPI helps them pay securely. So, it's like creating a shop on the internet where you can both shop easily and sell things if you're the store owner.
