PERSONAL PROJECTS

SafeXBlog (05/2023 - 06/2023)

- An authenticated blogging platform developed using React for frontend and Express.js, Node.js, and MongoDB for the backend.
- Implemented user authentication and CRUD functionalities for creating, reading, and updating blogs. Designed a schema to store blogs and images in MongoDB.
- This app demonstrates proficiency in full-stack development, MERN Stack to be precise.
- The technology used: MERN Stack, multer middleware for handling file upload system, Redux, JWT Token for security purpose

StreamFlix (03/2023 - 04/2023)

- Created a Netflix-inspired website using React and fetched data from the TMDB API. Designed responsive components for a user-friendly viewing experience.
- Integrated TMDB API for real-time movie data, resulting in an engaging User Experience and visually appealing design.
- This project showcases strong foundational development skills.

Personal Portfolio Website (05/2023 - 05/2023)

- Developed a personal portfolio website with a minimalistic design using React and CSS3.
- This project showcases all my skills, knowledge and projects.
- Integrated Emailjs to enable visitors to send emails directly from the website.

Open Weather App (04/2023 - 04/2023)

- Developed a weather app utilising Open Weather APIs to provide real-time weather data based on city names or pin codes.
- Unique feature: dynamic day-night background synced with city time. Intuitive icons for easy weather comprehension.
- Responsive design. Seeking to contribute these skills to a dynamic team.

CERTIFICATES

Web development Course (05/2021 - 07/2021)

Completed a comprehensive web development course, enhancing my foundational skills in web development. I earned a certificate for successfully completing the program, solidifying my expertise in this field.
