SUMMARY

I am a skilled web developer with experience in **React JS and Node JS**. Currently honing my skills as Software Engineer 1 at MAQ Software. My goal is to strive towards excellence and become a respected and accomplished developer

TECHNICAL SKILLS

Beginner	:	React Native, Typescript, Next JS, Tailwind CSS, Azure, Azure DevOps and Azure Data Factory
Intermediate	:	React JS, Node JS,Redux, HTML, CSS, Bootstrap, Material UI, Javascript, MongoDB, MYSQL, GIT, Java and Power BI

EXPERIENCE

Software Engineer 1   Apr 2023 – Present
MAQ Software   *– Noida, UP, India*

- Strong understanding of component-based architecture and state management in **React JS**
- Developed and maintained responsive web applications using **React JS**, ensuring optimal performance and user experience
- I collaborated with a team to develop a recruitment web portal that streamlines the onboarding process. This platform enables candidates to input their information, and interviewers can access and review their details and schedule interviews accordingly. After conducting the interview, interviewers can provide feedback on the portal regarding their decision to either select or reject the candidate.

Associate Software Engineer   Apr 2022 – Mar 2023
MAQ Software   *– Noida, UP, India*

- Assisted senior developers in the design and development of website using **React JS, HTML, CSS, Javascript**
- Integrated RESTful APIs and handled data fetching and manipulation in an efficient manner.
- Optimized web applications for performance and scalability, ensuring smooth rendering and fast loading times.

EDUCATION

Chitkara University   Baddi, Himachal Pradesh, India
Bachelors in Engineering   *Aug 2019 – July 2023*
CGPA: 9.6

PROJECTS

Instagram Clone –>   ***React JS, Redux, Node JS,Express, Mongo DB** and **NPM Libraries***   Source Code

- The objective of this project was to enhance my proficiency in the **MERN stack**.
- This web application allows users to create an account and share their moments by posting pictures with captions.
- It features interactive elements, such as the ability to like and comment on posts, as well as the ability for users to customize their profile to their personal preferences
- Utilized **responsive design** to ensure compatibility across all devices

Real-Time ChatApp –>   ***React JS,Node JS,Express JS** and **Socket IO***   Source Code

- This web application provides users with the ability to create their own private chat rooms, accessible only through a unique secret key.

Jira Project and Issue Management –>   ***React JS, Node JS, JIRA REST API** and **Atlassian SDK***   Source Code

- Completed a successful project utilizing Atlassian's SDK and creating a plugin, showcasing proficiency in React.js, Node.js, and Jira's REST API
- Developed a responsive UI using React.js, integrated with a Node.js server to fetch project details from Jira's REST API, and implemented functionalities such as displaying project information and performing actions like project deletion.
