Monu Daksh
MERN stack developer

Phone No. +91 9568142626

Email: monudaksh009@gmail.com

SUMMARY:

3.4+ years of experience building dynamic and user-focused web applications with React.js (including Hooks, Next.js). Leveraged this expertise to successfully expand into the MERN stack, mastering Node.js, Express.js, and MongoDB to deliver innovative solutions and collaborate effectively within development teams.

TECHNICAL SKILLS:

- **Languages:** JavaScript, ES6+, TypeScript, HTML
- **Frameworks:** React.js (incl. Hooks, Next.js), Redux
- **Backend:** Node.js, Express.js, RESTful API
- **Database:** MongoDB.
- **Tools:** GIT, Github, Webpack, Postman, Swagger, Jira.
- **Soft Skills:** Communication Skills, Teamwork, Leadership, Problem Solving.

EXPERIENCE SUMMARY:

- **Mobilecoderz.com – React Js Developer**   *Jan 2022 – Present*

  Responsibilities:

  - Developed dynamic and interactive UI components leveraging React.js (including Hooks) and RESTful APIs to deliver exceptional user experiences. Increased user engagement by 15% through performance optimization techniques that resulted in 20% faster loading times**.**
  - Spearheaded cross-functional collaboration to analyze project requirements, ensuring alignment with business objectives. Facilitated effective communication across teams, leading to a 20% improvement in project efficiency and on-time delivery.
  - Demonstrated strong problem-solving skills by integrating third-party APIs for enhanced functionality and seamless user experiences. Reduced development time by 10% by effectively integrating a payments API.
  - Maintained application uptime and performance by promptly resolving technical issues. Possesses excellent debugging skills and attention to detail

  Fourbrick Technology – React Js Developer   *Aug 2020 – Aug 2021*

  Responsibilities:

  - Maintained comprehensive documentation of tasks completed, adhering to coding standards, to ensure clear communication and project knowledge transfer for internal and client stakeholders.
  - Foster seamless teamwork through effective communication with team members and clients. Regularly communicated project updates, proactively sought clarification, and ensured clear understanding of project goals.

KEY PROJECTS:

Mypetcorner

- **Description:**
    - Developed a sustainable e-commerce platform (Next.js, React.js) for buying and selling second-hand pet accessories in France and Belgium (Front-End Development).
    - Integrated secure payments (MangoPay) and user verification (KYC) for a trusted user experience.
    - Enabled user negotiation and social features to foster a community-driven marketplace contributing to animal welfare.

LocalPosh:

- **Description:**
    - Developed a location-based e-commerce app for local businesses, leveraging Azure AI services for intelligent product search and user experience (Front-End Development).
    - Enabled users to discover and purchase products from nearby stores (within a 15-mile radius), fostering community engagement and supporting local economies.
    - Implemented AI-powered search with dynamic filtering to personalize product discovery for users.

Katana:

- **Description:**
    - Developed a full-stack talent acquisition platform (Next.js, React.js) featuring streamlined workflows for recruiters and candidates (Front-End Development).
    - Built user-friendly interfaces for recruiters (manage candidates, post jobs) and candidates (apply, submit video responses).
    - Enabled efficient candidate screening through video recording and assessment functionalities.

EDUCATION:

- B.Tech, May 2019, Galgotias University (Greater Noida, Uttar Pradesh, India)
