Professional Summary

Results-driven QA professional with over 9 + years of experience in delivering high-quality software products. Proven track record of leading successful testing initiatives and driving process improvements to ensure optimal efficiency and effectiveness. Seeking a challenging role as a QA Lead to utilize my expertise in test planning, team management, and quality assurance to deliver exceptional results. Adept at developing comprehensive test strategies, implementing test automation frameworks and conducting thorough functional and regression testing. Skilled in collaborating with stakeholders to understand requirements, address concerns, and ensure alignment throughout the testing process. Committed to driving excellence in software testing and leading teams to achieve organizational success.

Work Experience

Senior Software Test Engineer,

Intello Labs Pvt Ltd

April 2020 – present | Gurugram, India

- Possess hands-on experience of 2+ years in Automation testing with Selenium WebDriver.
- Proficient in developing and maintaining automation test frameworks and scripts using Selenium WebDriver with Java programming language.
- Establish and implemented QA formal processes, ensuring adherence to industry-accepted best practices and tools.
- Served as the primary point of contact for all QA aspects of releases, delivering QA services and coordinating resources both internally and externally.
- Demonstrated leadership skills by leading and mentoring the QA team, while effectively diagnosing defects and managing their resolution from discovery to closure.
- Proficient in reviewing requirements, specifications, and technical design documents, providing valuable feedback in a timely manner.
- Stayed updated with the latest mobile testing trends and technologies, continuously enhancing mobile testing strategies and methodologies to deliver high-quality mobile applications.

Senior QA Engineer & Scrum Master, INDmoney

March 2019 – April 2020 | Gurugram, India

- I have gained extensive experience working in Agile Methodology, actively participating in various activities such as Sprint Planning meetings, daily stand-ups, task breakdowns, and estimations.
- I effectively aligned testing cycles to adhere to the guidelines set within the SCRUM development process, ensuring seamless integration and efficient workflow.
- In my role, I actively contributed to functional and regression testing, utilizing JIRA for managing Requirements/User stories, test execution, and defect tracking.
- Developed and executed test cases and test scenarios specifically tailored for mobile platforms and covering both Android and iOS.
