- Manage Java and Java EE application development
- Identify and resolve any technical issues arising
- Integrating the application with My SQL Server 2008 database for all database connections.

### **Project**

**Project Title: DROPS**(Division and Replication of data in cloud for Optimal Performance and Security).

**Role** : Backend Developer.

**Team Size** 4

**Technologies**: Java, Spring, Html, Css, MySql, Postman, Maven.

**Description:** The aim of this project is the data compromise may occur due to attacks by other usersand nodes within the cloud. The data is highly secured and can be recovered even in case of successful attack by the attacker.

**Responsibilities:** As a Team member

- Involved in writing the technical documentation.
- Manage Java and Java EE application development
- Identify and resolve any technical issues arising
- Integrating the application with My SQL Server 2008 database for all database connections.

# **Skills**

- Languages: JAVA, SQL, PL/SQL.
- **J2EE Technologies:** JSP, Servlets, JDBC.
- Backend: Spring Framework, Spring Boot, RESTful APIs.
- Web Technologies: HTML5, CSS3, JAVASCRIPT.
- Databases: MySQL, Oracle.
- Version Control: GitHub
- Operating Systems: Windows, Linux.
- Tools: Eclipse, Visual Studio.
- Testing: Postman
- Web Server: Apache Tomcat.
- Build Tools: Maven

# **Certifications**

- Java: Career Bridge IT Services.
- Web and Mobile Application: Fact Set Nirmaan Organization.

#### **Declaration:**

Ihereby declare that the details given above are true to the best of my knowledge and belief.
