### About Me

- As a passionate Front-end developer, having strong foundation in **HTML, CSS, JavaScript, and React.js**.
- My expertise lies in building responsive and user-friendly websites that captivate and engage users.
- Optimizes applications for maximum speed.
- I'm always eager to take on new challenges and collaborate with like minded professionals

### Projects

#### React Project

##### 🌐 React-todo-app22

<https://react-todo-app22.netlify.app/>

- The React Todo app allows users to add tasks with a title and description.
- Users can delete tasks from the list.
- Users can edit the title and description of existing tasks using React state hooks

##### 🌐 Weather-lens22

<https://weather-lens22.netlify.app/>

- The Weather app provides weather details to users.
- The app is build using React, a JavaScript library for building user interfaces.
- Weather data is obtained from a Weather API, which allows the app to fetch real-time weather information

##### 🌐 Random-user-data-app

<https://random-user-data.netlify.app/>

- The React application generates random user data
- It utilizes the setInterval function to periodically fetch new user data from an API.
- The data fetched from the API includes information about random uses.

##### 🌐 Single-user-data-app

<https://single-user-data.netlify.app/>

- This React Application shows single user data throw **API**

### Website Layout Projects

##### 🌐 Your-dream-furniture

<https://your-dream-furniture.netlify.app/>

- Tech Stack : HTML | CSS3 | JAVASCRIPT

##### 🌐 Amazed-with-taste

<https://your-dream-furniture.netlify.app/>
