

Nimish Mahajan

Full Stack Developer

Ambala(India) | Feb 19,1998

mahajannimmish@gmail.com | +91 8295066680 | www.linkedin.com/in/mahajan-nimmish

SUMMARY

Full-stack developer with 2 years and 8 months of experience designing, developing, and deploying scalable applications. Proficient in full-stack technologies, cloud solutions, and automation. Experienced in creating reliable solutions to optimize workflows, enhance user experiences, and support business operations. Skilled in Agile development and stakeholder communication. My approach is rooted in “anticipating failure to ensure resilience” and “Life Long Learning”

SKILLS

- **Languages:** C#, Python, Node.js, C, Visual Basic (VB.NET), Java, and JavaScript
- **Frameworks and Libraries:** ASP.NET Core, React, Angular, .NET Framework, Entity Framework, MVC, Web API, REST Architecture, Object-Oriented Programming
- **Web development:** React, Angular, HTML, CSS, JavaScript, Bootstrap
- **Azure Services:** Azure App Services, Azure Functions, Azure SQL Database, Azure Blob Storage, Azure DevOps, Azure Storage Accounts, Azure Active Directory
- **Development:** Authentication and Authorization Implementation, API Consumption, RESTful Architecture, Windows Desktop Applications
- **Tools:** Visual Studio, Git, Postman, SSIS, SSRS, Power BI, JIRA
- **Databases:** MS SQL Server, MySQL, PostgreSQL, SQLite, MongoDB
- **IDEs:** Android Studio, Visual Studio, JetBrains, Eclipse, PyCharm, VS Code
- **Additional Skills:** Application Architecture, Secure Coding Practices, Agile Development Methodologies, Web Performance Optimization, Troubleshooting & Debugging

WORK EXPERIENCE

Flex Films Europa Sp. Z.O.O

Full-Stack Developer

August 2024 – Feb 2025

Remote

- Deployed a scalable .NET film inventory system to Azure, using Azure App Services and Azure SQL for film asset tracking and improved data access for all employees.
- Created an import/export script in Python to automate data management between Excel and SQL Server.
- Designed and built a React-based LED screen placement app to assist installation teams
- Automated the generation of installation diagrams in PDF with user-configurable options
- Enabled dynamic equipment selection from a database and real-time diagram updates.

Infosys

.Net Developer

August 2022 – July 2024

Mississauga, Canada

- Developed a VB.NET application for scanning Excel files containing machine data and automated identifying offline machines across multiple sites.
- Designed and developed large-scale applications using VB.NET, C#, .NET Core, MVC, React, HTML, CSS, JavaScript, and ASP.NET Core Web API.
- Implemented RESTful APIs using ASP.NET Core for mining asset tracking to enable data exchange between field devices, integrating with React front-end and SQL Server for asset reporting

- Managed SQL Server databases, wrote complex SQL queries, and integrated with SSIS to facilitate data migration.
- Developed authentication and authorization mechanisms with .NET Core and OAuth for role-based access control
- Utilized SSRS to generate custom reports for operations and management.
- Expertise in handling Service Now tickets, service requests, SLAs, incident and change management (RFCs), and major incident management (MIM) aligned with ITIL operating procedures.
- Proactively collaborated with cross-functional teams in an Agile environment, delivering high-quality solutions.
- Supported deployment and testing of process improvement tools in Agile sprints, maintaining stakeholder communication for project updates and feedback.
- Used Git for version control to manage the code repository, collaborate with team members, and assisted my manager with code review

INTERNSHIPS

Toronto Transit Commission

September 2018 – August 2019

End User Device Programmer

Toronto, Canada

- Proficiently employed ASP.NET application to remotely reboot domain-connected computers, ensuring efficient and secure system management.
- Designed internal tools utilizing RESTful APIs to validate equipment status to reduce testing time.

Flex Films Europa Sp. Z.O.O

May 2018-August 2018

IT Engineering Student

Września, Poland

- Proficiently configured Hyper-V and VMWare servers on the Windows Server 2008 platform, ensuring optimal performance and resource management.
- Developed a client portal to streamline film inventory updates and facilitate report preparation, enhancing operational efficiency.

Saint Elizabeth Healthcare

September 2017 – December 2017

Junior Mobility Specialist

Markham, Canada

- Prepared and provisioned mobile technology weekly for field staff, including device configuration and application setup. Played a key role in successfully deploying 9500 mobile devices.

CERTIFICATIONS

- Infosys Certification in .NET
- Infosys Certification in Python
- Infosys Certification in the Internet of Things (IoT)
- Infosys ITIL Certification

EDUCATION

Brock University

April 2022

Bachelor of Science (Honours), Computer Science

St. Catharines, Ontario
