SUMMARY

Dynamic IT professional with 6 months of internship experience in IT services, focusing on live production environments. Proficient in software development & front-end technologies, including HTML, CSS, and JavaScript, with hands-on experience in developing responsive and user-friendly applications developed on production. Skilled in collaborating with cross-functional teams to troubleshoot and resolve production issues efficiently. Strong problem-solving abilities and a passion for delivering high-quality software solutions. Eager to contribute technical expertise and a proactive approach to a forward-thinking organization.

TECHNICAL SKILLS

- Web development (front end technologies) – HTML5, CSS & Bootstrap (responsive design).
- Programming language - Core java SE8
- Microsoft office 365 & Windows Operating system
- IDE -Microsoft Visual studio & notepad++
- Manage engine understanding of TCP/IP & LAN/WAN technologies & Networking knowledge.
- Technical knowledge of PCs, laptops, Printers and peripheral hardware devices.
- Highly proficient in diagnosing and resolving onsite and remote PC related computing problems
- Cloud services & VM (Virtual machine)
- FTP tools (Filezilla and cPanel) and the ability to deploy projects on a live server.
- Word press with all plugins
- XAMPP (Apache & myphpadmin)

KEY SKILLS AND ABILITIES

- Leadership & Strategic thinking
- Communication skills & Time management
- Team management & interaction
- Problem solving & Quick learning
- Team leading & deadline task completion

WORK EXPERIENCE

NetForChoice Pvt Ltd -(2024 May – November)

IT services (In office - Internship)

Job role -

- Project (ITSM): improved ITSM server tool (essentially a server and management system ticket portal) in accordance with business requirements. Deploy several improvements, including report creation, data chat generation, UI modifications, and other minor, requested changes.
- Project (VMS): Developed a visitor management system (VMS) on the business server and implemented it in the office facilities. The frontend was designed in accordance

with the corporate theme, and the backend connectivity with the database was mirrored on the constructed VMS dashboard for data extraction.

- Web applications deployed for the purpose of organization –
 - 1) <https://nfcvault.com/>
 - 2) <https://n4c.in/>
 - 3) <https://npod.io/>
- Completed tasks on time and collaborated with team to ensure effective communication and participated in software application development and testing.
- Worked with cross-functional teams to collect needs and resolve challenges.
- Performed research and offered fixes for a range of IT-related issues.

EDUCATION

YEAR	COURSES WITH MARKS	SCHOOL & UNIVERSITY
2021-2024	B tech (Bachelor in Computer Science & Engineering) - 7.56 CGPA	Galgotias University, Greater Noida (Uttar Pradesh)
2018-2021	Diploma in computer science & engineering -7.65 CGPA	Galgotias University, Greater Noida (Uttar Pradesh)
2015	High school – 5.2 CGPA	National public school (Ghaziabad)

PROJECT

"Medical insurance cost prediction" is the project I created. For this project, I utilize the RFR random forest regressor technique with Python and a few artificial intelligence algorithms to forecast the cost of health insurance. In this instance, the user arrived at the index page or home page, provided the requested information, and used this project to obtain the estimated amount of insurance. I employ a variety of technologies in my project, including web technologies for user interfaces and Python library functions like flasks and RFR algorithms.
