LinkedIn ID URL: [linkedin.com/in/NitinLamba5](https://www.linkedin.com/in/NitinLamba5)

Experienced Software Testing Professional with around 5+ years of experience in both Manual and Automation Testing using Selenium Web driver for web automation, Rest Assured for Api automation, TestNG for test execution using Java language. I also indulge in planning and conducting the test activities. I also carry management skills and target oriented.

Technical Competencies:

- Strong experience in **web automation testing** using **Selenium WebDriver, Cucumber** and **TestNG** Framework using **JAVA**.
- Exposure on **API Automation Testing** using **Rest-Assured Java** library.
- Experience in developing automation **framework** from scratch.
- Hands on experience on **Source Code Management tool** like **GitHub** repository over the time for improvements and new features.
- Experience in Build Automation tools such as **Maven**.
- Experience in implementing **CI/CD pipeline** using Jenkins.
- Experience in testing of Web applications, iPhone and Android apps.
- Expertise in Bug Tracking Process, Familiar with Bug Reporting and Tracking using Bug Tracking tools like **Rally**.
- Experienced in Problem solving & troubleshooting skills.
- Worked on different domains B2B, Billing and CRM.
- Expertise in different phases of **Software Testing Life Cycle (STLC)** and **Software Development Life Cycle (SDLC)** including methodologies like **Agile** and **Waterfall**.

Roles & Responsibilities:

- Responsible for developing and maintaining the scripts
- Conduct **test case reviews**, provide project related status **reporting**, coordinate all release planning.
- Good experience in debugging, modifying, and enhancing automation test scripts.
- Actively involved in **automation code review** i.e., pull request or merge request.
- Helping other automation team members to resolve their technical queries.

ACADEMIC QUALIFICATIONS:

Bachelor of Technology: Computer Science

ORGANISATION WORK EXPERIENCE:

Currently working with **Seasia Infotech Pvt Ltd** from **July-22 to till date**.

Worked as Sr. QA Engineer with **Cogniter Technologies** from **Mar-18 to July-22**.

Projects with Seasia Infotech Pvt Ltd India:

Product Name: IHG (InterContinental Hotels Group)

Role: Senior Consultant QA

Team size: 9

Roles and Responsibilities (Senior Consultant QA)

- Automated assigned test cases with Selenium WebDriver using Java.
- Executed the test cases and done test reporting using TestNG.
- Prepare Test cases and perform test case execution with scenarios.
- Conducted cross browser testing in Google Chrome and Firefox using Selenium Web Driver.

Projects with Cogniter Technologies:

Product Name: FSM (Web)

Role: Senior QA Engineer

Team size: 10

Description: This helps them to prepare, plan, fix, document, and invoice all field service activities through a single pane of glass. It tracks different field operations and helps to boost service activities by registering the service calls, completing the work orders on time, and managing the invoices effectively.

Roles and Responsibilities

- Worked on Hybrid framework using TestNG and Selenium Webdriver.
- Conducted cross browser testing in Google Chrome and Firefox.
- Worked on already created Rest Assured API Automation framework.

Product Name: Asset Management (Web)

Role: Senior QA Engineer

Team size: 13

Description: Asset Management allows users to keep a record of deploying, operating, maintaining, upgrading and disposing of items and user can also use RFID tag to check whether the item status is available, assigned or missing.

Roles and Responsibilities

- Prepare Test cases and perform test case execution with scenarios.
- Run manual and automated suite during regression testing and createdefects by classifying them based on severity, priority.
- Automation framework design and implementation according to project structure

Product Name: Talygen CRM (Web)

Role: QA Engineer

Team size: 8

Description: CRM allows users to seamlessly manage their Campaign, Lead, Deal and Vendor. In this user can create quotation, sales order and invoice. The module enables a user to manage and analyze customer interactions and data throughout the customer life-cycle.

Roles and Responsibilities

- Develop test cases and prioritize testing activities.
- Execute all the test case and report defects, define severity and priority for each defect.
- Carry out regression testing every time when changes are made to thecode to fix defects.

Product Name: Ticketing System (Web & Android)

Role: QA Engineer

Team size: 10

Description: Ticketing System allows users to create, receive, process, and respond to the submitted tickets. The module enables the organization to create their own Ticketing system to keep track of all the issues and create their own SLA (Service Level Agreement) on the basis of the priority of issue or department wise.

Roles and Responsibilities

- Collaborate closely with other team members and departments.
- Understanding the functional flow of the application across variousmodules.
- Analyze product requirements and prepare test strategies and scenarios.
- Performed API testing using the Postman tool.
- Preparation of Test Cases of the enhanced feature in the module.
- Execute all levels of testing (System, Integration, and Regression).
- Defect Logging and Defect Resolution.
- Verification of the fixed issues identified in testing phase.
