WORK EXPERIENCE

UI/UX Developer, React.js

Crazy Rich Labs Pvt.Ltd | August-2023 - October-2023

- Used ReactJS, GitHub, CSS Stylesheets, and Google Analytics for project development and user experience enhancement.
- Demonstrated strong developmental skills with a logical and self-motivated learning approach.
- Engaged throughout the project lifecycle from planning to deployment. Collaborated effectively with cross-functional teams to troubleshoot and drive success.
- Maintained a proactive stance in seeking opportunities for skill expansion in web development.

EDUCATION

Bachelor's Degree in Computer Science Engineering

PROJECTS

Weather App
- I built a Weather App using React.js and OpenWeatherMap API for users to check current weather conditions by city. The app features a responsive interface with intuitive controls and accurate data fetching, emphasizing my skills in React.js, API integration, and UI design.

Dictionary app
- I created a Dictionary App with React.js, enabling effortless word searches and instant definitions. Through efficient state management and API integration, I ensured smooth functionality and real-time updates. By focusing on user-friendly design and error handling, I delivered a seamless browsing experience. This project highlights my expertise in React.js development. School portal
- Developed a school portal with React.js during internship. Designed sign-in, sign-up, password reset, OTP verification, and captivating landing page showcasing school information. Demonstrates expertise in React.js and UI design.

RichHealth App (Backend)
- Developed a secure backend for a fitness app with JWT authentication and bcrypt hashing.
- Built RESTful APIs for signup, login, and fitness tracking with dynamic unit conversion. Optimized performance with rate limiting and ensured seamless integration with the RichHealth frontend.

SKILLS

- Mern Stack
- AI in marketing
- Programming in Java
