SUMMARY

I am a passionate Frontend developer who enjoys building in a thoughtful and calm manner. I am continuously evolving and learning, improving my skills day by day. I am looking forward to great opportunities to enhance my abilities and contribute to a company where I can grow and thrive.

EDUCATION

D.Y Patil International University   Pune, Maharashtra
Master's of Computer Application   *2022 - 2024*

J.E.C.R.C University   Jaipur, Rajasthan
Bachelor's of Computer Application   *2019 - 2022*

TECHNICAL SKILLS

Front-End: Javascript, Html5, Css3, Scss, Tailwind Css, Bootstrap, MaterialUI
Back-End: Node.js, MongoDB
Frameworks: React.js, React-Toolkit, Next.js, Fetch Api, Axios, React Libraries
Others: AWS-Amplify, Git, Postman, Api-Integration, RESTAPI, JWT

EXPERIENCE

Frontend Developer   June 2024 - Present
Gill Broking Pvt. Ltd   *Faridabad, India*

- Collaborated with **UI/UX** designers to transform wireframes and prototypes into intuitive, user-centric interfaces using **React.js**, while ensuring codebase integrity through **Git** for effective team collaboration.
- Developed responsive admin panels leveraging **Bootstrap, MaterialUI,** and **React.js**, implementing secure authentication and authorization with **JWT** to optimize internal workflows and enhance application security.
- Gained proficiency in **AWS-Amplify** for efficient application deployment and integrated RESTful **APIs** using **Fetch** and **Axios**, employing Session and Local Storage to manage state, while maintaining clean code standards and adhering to **camelCase** naming conventions.
- Enhanced the user experience of the **trading app dashboard** by implementing responsive design principles and optimizing performance, leading to a smoother interaction for end-users.   (Link)
- Worked on the official company website to improve accessibility and SEO, resulting in better visibility in search engine results and increased user engagement.   (Link)
- Played a key role in developing features for the company's primary website, ensuring that it reflects the brand identity and meets client expectations through modern design and functionality.   (Link),

Web-Developer (Intern)   June. 2023 – Aug 2023
MediaFleetBlue Pvt. Ltd   *Varanasi, India*

- Assisted in front-end development tasks using HTML, CSS, and JavaScript to enhance website aesthetics and functionality.
- Collaborated with team members to troubleshoot and debug code, ensuring smooth functionality across various browsers and devices.
- Participated in code reviews and version control using Git, maintaining code quality and integrity throughout the development process.

PROJECTS

FoodLivery App (MERN)

- Independently developed a full-stack Food Delivery App clone using HTML, CSS, Bootstrap, React, Node.js, and MongoDB, handling both frontend and backend development.
- Integrated authentication and authorization features using JWT tokens and decryption encryption to ensure secure user accounts and transactions.
- Implemented a RESTful API architecture in Node.js with Express, providing efficient communication between the frontend and backend, and facilitating smooth data retrieval and manipulation.
