Academic Projects

Title	: **Web Chat Application**
Platform	: Java, Spring Boot, Html, CSS, JavaScript, Web Socket **Duration :** 1 Month
Description	: You can just type in your name and start chatting with others. If no one is available in the chat room, then you can open the app in two tabs, log in with different usernames .and start sending messages. WebSocket is a communication protocol that makes it possible to establish a two-way communication channel between a server and a client. WebSocket is supported all almost every browser and in most modern web browsers also.

Title	: **Design and Fabrication of Braking System**		
Platform	: Creo Parametric -2.0	**Duration:** 6 Months	
Description	: brake is an energy recovery mechanism that slows a vehicle by converting its kinetic energy into another form, which can be either used immediately or stored until needed. Thus, the generated electricity during the braking is fed back into the supply system (in the case of electric trains), whereas, in battery electric and hybrid electric vehicles, the energy is stored in a battery or bank of capacitors for later use. Energy may also be stored by compressing air or in a rotating flywheel.
