Professional Experience: Projects -2 (Investment Banking)

○ From Oct 2019 to Aug 2021 :

Project Title	: Funds Portfolio Series (FPS)
Client	: Capital Group, USA
Role	: Software Test Engineer

Project Description:

The American Funds Portfolio Series is designed to help investors pursue long term investment success. Consider what these funds offer: Purchase a diversified portfolio of American Funds in a single transaction. Easily incorporate funds into your investment portfolio based on common objectives. Separate assets that you want to protect from those you're willing to subject to more volatility to pursue long-term goals. Whether for stake-building, hedging, yield enhancement, or disposal, we help our clients to manage their equity stakes worldwide. That means no more silos. No more multiple platforms and login credentials.

Responsibilities:

- Understand the Customer Requirements by Analyzing SRS Documents
- Generating the Test scenarios and Test cases.
- Involved in designing the Test Cases and test case review.
- Performed Functionality Testing, Retesting and Regression Testing.
- Execute and evaluate manual or automated test cases and report test results.
- Identification of defects, Log the defect in Jira.
- Participate in scrum meeting to discuss about project progress report every day.
- Reporting and documenting technical issues and driving them to closure.
