Listening to Music

Radhika Verma

Full Stack Developer

Dynamic and skilled Full Stack Developer with 2 years of experience in web development. Proficient in both front-end and back-end technologies, with a strong understanding of the full software development lifecycle. Experienced in designing and implementing responsive, user-centric web applications . Adept at collaborating with cross-functional teams to deliver high-quality solutions within project timelines. Proven ability to adapt to evolving technologies and quickly learn new tools and frameworks. Seeking to leverage technical expertise and problem-solving skills to drive innovation and contribute to impactful projects.

Projects

Deliver My Tune

DelivermyTune is a project focused on providing a seamless music delivery platform that connects artists with their audience, enabling personalized, secure, and efficient distribution of music. The service streamlines the process from creation to delivery, ensuring a user-friendly experience for both musicians and listeners.

Responsibilities

- UI Development: Build and maintain dynamic, responsive interfaces using advanced frontend frameworks.
- API Integration: Collaborate with backend teams to integrate and optimize API performance.
- Responsive Design: Ensure a seamless experience across various devices and screen sizes.
- Performance Optimization: Focus on enhancing application speed, security, and scalability.
- Code Quality: Adhere to best practices in coding, ensuring clean, maintainable, and accessible
- **Technology:** React Js, Node Js, MongoDB

Pest Control M. Walshe (PCMW)

The Admin Portal Web Project aims to develop a comprehensive, user-friendly platform for administrators to efficiently manage and monitor various aspects of the system. Key features will include real-time data analytics, user management, and customizable reporting tools, all designed to streamline administrative tasks and enhance overall operational efficiency.

Responsibilities

- Invoice Creation: Generate invoices with customizable templates, including itemized lists, pricing, and tax calculations.
- Automated Billing: Schedule and automate recurring invoices to ensure timely and consistent billing.
- Payment Tracking: Monitor payment statuses, manage overdue accounts, and send automated reminders.
- Reporting: Provide detailed reports on invoices, payments, and outstanding balances for financial analysis.
- Integration: Connect seamlessly with accounting systems and other modules for unified financial management.
- **Technology:** React Js, Node Js, MongoDB

Hostel Duniya

Hostel Duniya is a web-based platform that allows users to log in, check the availability of hostels near their college or city, and schedule visit timings. The platform also enables administrators to manage hostel listings, amenities, and services.

Responsibilities

- Manage Hostel Listings: Add, update, and remove hostel information including names, locations, and amenities.
- Oversee User Accounts: Handle user registrations, logins, and account management.
- Update Availability: Ensure accurate availability status for hostels and update it as needed.
- Schedule Management: Manage and approve visit scheduling requests from users.
- Content Management: Maintain and update all content related to hostels, services, and amenities on the platform.
- **Technology:** React Js, Node Js, MongoDB
