

### ABOUT ME

<https://rahul-portfolio-38f7d.web.app/>

Experienced Frontend Developer within web development. Skilled in React, JavaScript, HTML, CSS, Redux, and Firebase. Successfully completed projects involving state management, API integration, and multilingual support. Proficient in creating responsive and user-friendly web applications. Excited about leveraging my skills to contribute to innovative projects and enhance user experiences.

### WORK EXPERIENCE

#### Frontend Developer Intern - Giftonic

Sept 2023 - Feb 2024

Trained on web development for 5 months and made several small projects using concepts of HTML, CSS, JavaScript and React.

Worked in a shadow project for a month and created an e-commerce web application called milliniel shopping.

Features included in the application :-

- Created a secure Login and Sign up system to manage user accounts.
- Designed an intuitive Home screen for easy navigation.
- Developed a Products Section to showcase a variety of products.
- Implemented a contact section for user inquiries.
- Created a Cart section with Add and Remove functionality to facilitate seamless shopping experiences.
- Tech stack used : HTML, CSS, JavaScript, React, Redux, Bootstrap, Font awesome.

#### Amazon - AVOC Associate

May 2022 - Feb 2023

Managed real-time operational issues and ensured smooth execution of logistical processes. Utilized technical tools to monitor performance metrics and resolve customer inquiries promptly. Collaborated with team members to optimize workflow efficiency and meet service level agreements. Demonstrated strong communication skills in a fast-paced, customer-centric environment

### PROJECTS

#### NetflixGPT

Frontend Development and State management:-

- Configured Tailwind CSS for app styling, including header, routing, login form, signup form and dorm validation.
- Implemented useRef hook for efficient form handling.
- Managed user authentication, including signup, sign out and profile updates.
- Addressed bugs related to user signup display names and login/logout redirection.
- Established Redux store with userSlice for streamlined state management.

API Integration :-

- Integrated TMDB API for fetching now playing movies list and trailer data.
- Handled API token management for secure access.
- Created custom hooks and components for efficient data fetching and display.

Netflix GPT Integration and Multilingual Support :-

- Interactive search bar and tailored movie recommendations powered by GPT.
- Handled API token management for secure access.
- Integrated GPT - powered multilingual features, enabling seamless language translation.
- Ensured responsiveness across various devices for enhanced accessibility.
