Objective

To secure a challenging role as a Full Stack Web Developer where I can leverage my expertise in front-end and back-end development, desktop application development, and innovative problem-solving to contribute to organizational success.

Professional Summary

Full Stack Web Developer and Desktop Application Developer with 2+ years of experience in designing, developing, and delivering scalable web, desktop, and mobile applications. Proficient in modern JavaScript frameworks, backend technologies, and database management, with additional expertise in VB6 for accounting-based desktop solutions integrated with Busy Accounting Software. Skilled in end-to-end project lifecycle management and collaboration with cross-functional teams.

Technical Skills

- **Front-End**: HTML5, CSS3, JavaScript (ES6+), React,
- **Back-End**: C#, .NET Core, .NET MVC
- **Database**: SQL Server, PostgreSQL, MySQL, MongoDB
- **Desktop Development**: Visual Basic 6.0
- **API Development**: RESTful APIs,
- **Version Control**: Git, GitHub, GitLab, Jira, Bitbucket

Education

B.Tech in Information Technology
Abdul Kalam Technical University, Lucknow – 2021

Professional Experience

Full Stack Web & Desktop Application Developer
Excellent Softwares, Noida, UP
July 2022 – Present

- Developed scalable web applications using .NET Core and React, increasing user engagement by 30%.
- Designed RESTful APIs and optimized database queries, reducing response times by 20%.
- Delivered multiple VB6-based desktop applications integrated with Busy Accounting Software for accounting and inventory management.
- Developed backend services for mobile applications, ensuring seamless data exchange and performance.
- Collaborated on Agile teams, contributing to sprint planning, stand-ups, and retrospectives.

Key Projects

Beta 3

Role: Backend Developer
Technologies: C#, .NET MVC

- Developed backend services for a mobile application, handling user authentication, data synchronization, and API integration.
- Enhanced app performance with optimized database interactions.

JSL

Role: Backend Developer
Technologies: C#, .NET MVC Core

- Built backend for a lighting-focused web application, managing APIs for product listings, user interactions, and orders.
- Implemented authentication and authorization mechanisms to ensure data security.

Point of Sale (POS)

Role: Full Stack Developer
Technologies: React, .NET Core Web API, SQL Server

- Developed retail POS software with inventory tracking and barcode scanning features.
- Deployed applications to client environments and provided ongoing support.

Diamond Footwear (Accounting Software)

Role: Full Stack Developer
Technologies: React, .NET Core Web API, SQL Server

- Automated financial processes including accounts receivable/payable, inventory, and reporting.

Accounting Desktop Applications

Role: Desktop Application Developer
Technologies: Visual Basic 6.0

- Delivered custom accounting solutions integrated with Busy for financial reporting and transaction management.

Strengths

- Proficient in backend and desktop application development
- Strong problem-solving and analytical skills
- Expertise in integrating APIs and database optimizations
- Collaborative team player with effective communication skills
