WORK EXPERIENCE

Software developer

Optimus Infracom

01/2020 - 05/2020

Noida

Identified and fixed bugs and issues in iOS applications through rigorous testing, debugging, and troubleshooting.

Achievements/Tasks

- Quality Assurance and Testing:** Led efforts to establish a comprehensive test suite, including unit tests, integration tests, and end-to-end tests, ensuring robustness and reliability of software products.
- Innovation and Problem Solving:** Developed a custom algorithm to optimize database queries, resulting in a 30% reduction in query execution time and improved system performance for a large-scale web application.

Software developer

Genx eSolution

09/2019 - 01/2020

Noida

Integrated RESTful APIs and web services to fetch and send data between iOS applications and backend servers. Implemented user interface designs provided by UI/UX designer. Implemented user interface designs provided by UI/UX designer. In my role as a developer, I've had the privilege of working on three exciting mobile application projects, **E-commerce Marketplace**, **Social Networking Platform**

PERSONAL PROJECTS

E-commerce App

- User Experience Optimization:** Designed and implemented intuitive user interfaces, product listings, and checkout flows to enhance the shopping experience and increase conversion rates.
- Search and Recommendation Engine:** Developed a robust search engine with features such as autocomplete, filters, and sorting options to help users find products quickly and efficiently.
- Inventory Management:** Designed and implemented inventory management features to track product availability, restocking, and order fulfilment, reducing out-of-stock incidents by 20%.

ACHIEVEMENTS

Recognition and Awards :Received industry recognition and awards for outstanding UI design], showcasing creativity, innovation, and excellence in UI design practices.
