

# Ramanand Dubey

Software Engineer

## PROFILE

Fresher web developer proficient in English, Hindi and Nepali languages seeking a challenging role as a Software Engineer. Skilled in developing websites and problem solving, with a strong understanding of programming languages and frameworks. A hardworking and dedicated person with a passion for creating innovations and Bootstrap.

## PROJECTS

### 1. Form Filling Website | Mini Project

This is a complete website that is useful in filling exam forms manually by taking the data from user.

### 2. Weather Results

This is web page that is capable of giving the weather reports of any city around the world using API.

### 3. Personal Website | As an Intern

This is a website of a professional advocate which was made by a web developer team.

### 4. Portfolio

This is my portfolio which explains everything about me. Based on HTML, CSS and bootstrap.

### 5. Crop Recommendations System | Major Project

This is a web page that uses machine learning to predict which crop can be grown properly using the data of soil nutrients.

## EXPERIENCES

### 1. Innovilla | CDC Building, BHU, Varanasi | Web Developer

June 2023 - July 2023

Worked as a Front-End Team to create a website named 'Equilaw Associates' for an advocate's personal website.

### 2. Generative AI | Google

25 February, 2024

Completed the course on Generative AI and came to learn about Artificial Intelligence, Machine Learning and Deep Learning.
