### MentorIF

📅 December 2020 - January 2021

- Developed and maintained the front-end functionality of websites.
- Helped to achieve a consistent, look and visual theme across the website by promoting uniform fonts, formatting, images, and layout.
- Ensured Scalability of front-end elements by optimizing them for loading speed and performance.

## PROJECTS

### Ecommerce Website

[Git repository Link](#)

- Created an eCommerce website where users can add and remove products to the cart and place an order.
- Implemented intuitive React components for the frontend, ensuring seamless product management and user interaction.
- Set up routes to add products and display them on the front end.
- Designed schema for users, products, carts, and orders and setup associations among them.

### Expense Tracker

[Git repository Link](#)

- Created an expense tracker where a user can log in, signup, add and remove expenses and also download the reports of expenses .
- Utilized React frontend with Context API for scalable state management in expense tracking.
- Added authentication for the user using jwt token.
- Used Bcrypt library for encryption to store passwords in database.

### Group Chat Application

[Git repository Link](#)

- Created a group chat application where users can log in and send and receive messages.
- Employed Redux Toolkit within React frontend for seamless real-time group chat state management.
- Designed schema for chats, users, and groups and setup associations among them
- Implemented an Admin feature for the group that can add and remove users.
