## SUMMARY:

Full Stack Software Developer adept at crafting robust, scalable solutions from backend to frontend, leveraging diverse tech stacks for optimal user experiences.

## TECHNICAL SKILLS:

- **Frontend** - JavaScript, ReactJs, Nextjs14, TypeScript
- **Backend** - Node.js, Express.js, TypeScript
- **Additional Languages** - JAVA, Python
- **Database** - mySql, MongoDB, PostgreSQL

## EXPERIENCE:

**Frontend Developer Intern -** Crodor (Unique Plastic Industries)  |  Nov 2023 - May 2024

- Spearheaded the creation of dynamic and user-friendly e-commerce components and pages using React.js and Next.js, driving increased user engagement and retention rates on the company's product platform.
- Streamlined the frontend development process, resulting in improved website responsiveness and navigation, ultimately boosting conversion rates and customer satisfaction.
- Actively participated in sprint planning and daily stand-up meetings, demonstrating strong problem-solving skills and adaptability while delivering high-quality code within project timelines.

## PROJECTS:

[GitHub]  |  [Website]  **Airbnb Clone -** Front End and Back End Development

**Tech Stack:** NextJs,, Tailwind, Cloudinary, MongoDB, NextAuth

- Frontend Development using Next Js for creating interactive, intuitive and responsive user interfaces.
- Backend development with MongoDB and NextAuth, utilizing Next.js API routes for a secure Airbnb clone.
- Database management utilized MongoDB to store and manage product information and user data.
- Facilitating property listing and rental transactions for owners and renters within the platform.

[GitHub]  |  [Website]  **Realtime Chat Application -** Front End and Back End Development

**Tech Stack:** ReactJs, Firebase (Authentication, Database, Storage)

- Frontend Dev. utilizing ReactJs to create a responsive chat interface, facilitating real-time communication.
- Backend development integrated Firebase Authentication, Realtime Database, and Storage services.
- Firebase Storage to efficiently store and manage multimedia content shared within the chat application.

[GitHub]  |  [Website]  **SaaS AI Platform -** Front End and Back End Development

**Tech Stack:** Next.js 13, React, Tailwind, Prisma, Stripe

- AI-powered SaaS platform enabling users to generate content seamlessly in various domains.
- Implemented Clerk for secure and efficient user authentication, Integrated Crisp for real-time chat support.
- Incorporated Stripe for subscription management, offering users the flexibility to choose premium plans.

## EDUCATION:

**Vellore Institute of Technology (VIT),** Vellore  |  Master's Degree in Computer Applications  |  Sept 2022 - May 2024 **[8.5 CGPA]**
