## Summary

Associate Software Engineer with experience in full-stack development utilizing Java and React.js. Skilled in creating dynamic frontend pages using React.js to enhance user experience.

## Experience

### Associate Software Engineer(React, Javascript, Java)

Sonetel

Jul 2022 - Present (8 months)

1. Proficient in React and experienced in building web pages from scratch.
2. Successfully developed web pages - the Call Recording Page and AI-FAQ page - which involved integrating with external APIs and creating the entire user interface.
3. Implemented a feature in the Call Recording Page that allows users to download audio recordings from an S3 bucket directly to their desktop.
4. build functionality to convert JSON data to CSV format, making it easier for users to download and analyze the data as an Excel file.
5. Developed a zip file that can be downloaded by users to back up their call recordings and ensure data safety.
6. Collaborated with cross-functional teams to ensure the pages were user-friendly and met the company's requirements.
7. Experience in full-stack development utilizing Java and React.js
8. Worked in the backend to add user-friendly feature in the app..
