EDUCATION

B.TECH in Computer Science
GLA University, Mathura
2019-2023

PROFILE

An experienced software developer with a focus on creating extensive software solutions. Skilled in programming languages such as C++, React, and Java, I have a logical and detail-oriented approach to problem-solving.

In my previous internships, I have had the opportunity to work with other industry experts to produce cutting-edge software solutions. I believe in utilising effective software development practices that are committed to meeting user needs.

EXPERIENCE

SOFTWARE DEVELOPER INTERN   *July, 2022- Dec, 2022*
ImmunifyMe Healthcare Technologies l Gurugram, Haryana

- The internship integrated a number of educational opportunities with real-world project experiences. The initial few months were mostly devoted to front-end technologies, such as the development of static Web pages for the primary client retail project.
- Developed various wireframes and APIs for the ongoing sales portal.
- Created and integrated a web app for easy data manipulation and management for internal stakeholders.
- Additionally, it helped in gaining an in-depth understanding of the company's organisational and technical levels while working on various projects.

PROJECTS

Monde Collection

Using PHP as the backend and MySQL as the database, a fully functional retail website was constructed with a home page and authentication page for users.

Hybrid-Mobile App Development

Live apps on Expo.io were created using React Native, including calculators, a live clock, and a resume builder app with interactive user interfaces and Firebase data storage.

Notesminder

Created dashboards with new authentication functionality for managing notes using RestAPIs and MERN stack.

Intellivest

Created a static website with a sign-up page, home page, etc. to display stock-related data using HTML, CSS, and JS.

CO-CURRICULAR ACTIVITIES

- Content & Curation Volunteer (E-Cell GLA) (*12/2019 - 09/2020*)
- Corporate Relations Volunteer (LILM, GLA) (*09/2020 - 08/2021*)
