Multi-Vendor System

The Word Press Woo Commerce Multi-Vendor System Plugin explicitly developed to switch your Woo Commerce website into a multivendor platform that having multiple sellers with a separate profile. It gives sellers the functionality of adding products and order management from the seller panel.

Inventory Management System

Using this module, the warehouse managers can easily manage the orders arrived at various warehouses for delivery. This module provides an android and iOS application at the warehouse manager's end to manage and verify the orders arrived at the warehouse. The admin can create various warehouses and assign warehouse managers to those warehouses.

Point of Sale(POS)

Point of Sale System which provides store owners to have the functionality, where they can easily manage their online stores along with the physical outlets. The physical stores will have a POS front-end management system for which the admin can assign a store agent who can easily manage the sales and customers at that particular store. It lets retailers manage the products along with the inventory. POS holds all the tracks for customers and their respective orders.

Prescription

Prescription helps customers to buy medicines from an online pharma shop by uploading a prescription for the medicines. File attachments are useful for uploading a doctor's prescription for buying medicines, vaccines, or other types of drug products online. The type of files supported for uploading a prescription/attachment are jpg, jpeg format.
