SKILLS

PROGRAMMING

Over 5,000 lines:

HTML • CSS • JavaScript • React.JS
Tailwind CSS • Redux • TypeScript
Next.JS • Express.JS • MongoDB
Node.JS

Familiar:

Illustrator • Photoshop
Figma • UI/UX

OTHER

Git • Vs Studio • Postman
Axios • SASS

PROJECTS

AMAZON CLONE APP | REACT.JS BASED PROJECT

May 2023

Amazon Clone app built from scratch that displays the basic structure of an app.

Features :

- Multipage application with **CSR**(Client-Side Rendering) using **React-Router**.
- It uses multiple **Context API** with the ability to keep track of total cost by adding items to the cart.
- An Authentication form that will allow the user to log in using **FireBase**.
Checkout [live](#) and [Github](#) Repository.

WEATHER APP | REACT.JS API BASED PROJECT

May 2023

The weather forecast application shows climate conditions using weather API.

Features :

- It uses an HTTP client called **Axios** that is used to send asynchronous HTTP requests to REST endpoint to retrieve data.
- Search through various cities to check the climate in our city or another city.
Checkout [live](#) and [Github](#) Repository.

TODO-LIST APP | REACT.JS BASED PROJECT

May 2023

A Todo-List application made with **Advanced React Hooks**.

Features :

- Utilize **CRUD** functionality which allows users to Add, Edit and Delete tasks.
- It also has the ability to disable todo(mark as read) without deleting it.
- Utilizes react features like **custom Hooks**, **useReducers** and **Context API**.
Checkout [live](#) and [Github](#) Repository.

DAD-JOKES APP | REACT.JS API BASED PROJECT

March 2023

The API-based application shows a set of jokes at random using Dad Joke API.

Features :

- This application has the capability of showing up to 10 random jokes from a collection of jokes at a time.
- There is also an **Upvote and Downvote** system that reflects in emoji reactions provided within the application.
Checkout [live](#) and [Github](#) Repository.

FOOD BASKET APP | EXPRESS | EJS | MONGODB | RESTFUL ROUTES-BASED PROJECT

February 2023

It's a Text-Based Web Application uses **EJS template** and **RESTful Routes**.

Features :

- It has **CRUD** functionality that lets you add items and their quantities, which get stored in **local database** with the help of **MongoDB**.
Checkout [Github](#) Repository.

AUTHENTICATION PAGE | REACT.JS | FIREBASE AUTH BASED PROJECT

May 2023

Features :

- It uses **Context API** to keep track of user if the user logged in or not, It also lets you create a new account if the user does not exist.
Checkout [live](#) and [Github](#) Repository.
