PROFILE SUMMARY

7+ years of thorough exposure in **Quality Assurance** including **Selenium Web Driver** hands on experience. Good exposure of testing lifecycle and different approaches towards testing.

Objective

Looking to secure a challenging and rewarding new role within QA, where skills, knowledge and expertise gained throughout previous experience can be transferred across and utilized to best effect for the benefit of your organization

Key Skills

- Programming Language: **JAVA**
- Automation Testing Tools: **Selenium WebDriver, TestNg, Soap UI, REST Services**
- Automation Framework: **Keyword Driven Development, Data Driven Development, Behavior driven development & Hybrid Driven Development**
- Defect Management Tool: **QTest, JIRA, HP ALM(Rally)**
- Database: **Oracle SQL**
- Project Domain: **Salesforce.com, US Healthcare, oracle HCM(PeopleSoft), Financial**
- CI/CD**: Jenkins, git**
- Project Management Tools: **Maven,**
- **Basic knowledge of REST services, Docker**
- Key Testing Techniques:
  - **Black Box testing**
  - **Functional Testing**
  - **Automation testing using Selenium**
  - **SFDC CRM Testing**
  - **People Soft HCM Testing**
  - **Agile Testing**
  - **Database Testing**

Work Experience

Current Employer: **NTT Data**

Designation: **Industry Consultant**

IT

Period of Service **- From 19ᵗʰ April 2021 till present.**

Previous Employer: **Infosys**

Designation: **Test Engineer**

Period of Service **- From 23ʳᵈ Nov 2015 to12th Feb 2021.**

PROJECTS HANDLED

1.

Title	**:**	**PBM**
Client	:	CareFirst CVS
Role	:	Manual/Automation

- Understanding Business Requirement from SMEs and based upon understandings, finding Requirement Defects by Pre - QA Testing approach.
- Attending grooming sessions for providing the estimation or story points of each story to scrum master
- Writing test scripts for automation.
- Executing Tests and generating report in html format using extent Test.
- Regression Testing
- Attending Planning, grooming, touch point Retrospective meeting of each sprint
- Following Agile Methodology.
- Keyword Driven Testing approach
- Actively involved in collaboration and communication with developers and client team

5.

Title   :   **VZLearn, VZWeb, VZSearch**

Client   :   Verizon Communications Inc.

Role   :   Automation Tester

Duration   :   Dec 19-feb 12 2021

Description   :   A learning application portal through which user can interact with customized UI based on profile permissions and accessibility and populating data based on Users.
E.g., Certifications, Courses, Programs etc.

Tools: **JIRA, Selenium WebDriver, Jenkins, Gitlab, Oracle SQL, One Artifactory**

Roles and Responsibilities:

- Understanding Business Requirement from SMEs and based upon understandings, finding Requirement Defects by Pre - QA Testing approach.
- Writing optimized test scripts for automation.
- Test Framework Design and upgradation.
- Executing Tests in Jenkins and generating report in html format using extent Test.
- Regression Testing
- Following Agile Methodology.
- Keyword Driven Testing approach
- Supporting automation tasks for other projects also.
- Performing PUC on Infosys Test Automation workbench Tool.
- Actively involved in collaboration and communication with developers and client team

6.

Title   :   **NTPS (Transportation domain)**

Role   :   Automation Tester

Duration   :   April-21 to Feb-22

Description   :   A metro based transportation application portal through which user can interact with customized UI based and perform operations like card top up, wallet, customer mgmt etc.
E.g.,Topco, opco portal

Tools: **JIRA, Selenium WebDriver, Oracle SQL, Rest Assured Services, eclipse**

Roles and Responsibilities:

- Understanding Business Requirement from SMEs and based upon understandings, finding Requirement Defects by Pre - QA Testing approach.
- Writing optimized test scripts for automation.
- Test Framework debugging and execution.
- Executing Tests in Jenkins and generating report in html format using extent Test.
- Regression Testing
- Following Agile Methodology.
- Keyword Driven Testing approach
- Actively involved in collaboration and communication with developers and client team

6.

Title   :   **Mastercard Processor Migration Integration**

Role   :   Automation Tester
Duration   :   march 2022- till
date

Description   :   A prepaid card application portal through which user can interact with customized UI based on profile permissions and accessibility and populating data via api calls based on multiple clients and users.
E.g., Branch portal, csr portal, tcw portal

Tools: **HP ALM(Rally), Selenium WebDriver, Java, Jenkins, Git bash, eclipse, Soap UI, Ready API, Postman, IntelliJ**

Roles and Responsibilities:

- Understanding Business Requirement from SMEs and based upon understandings, finding Requirement Defects by Pre - QA Testing approach.
- Writing optimized test scripts for automation.
- Executing Tests in Jenkins and generating report in html format using extent Test.
- Regression Testing
- Following Agile Methodology.
- Data Driven Testing approach
- Supporting automation tasks for other projects also.
- Actively involved in collaboration and communication with developers and client team
