## EDUCATION

---

### Dronacharya Group of Institution

*B.Tech. in Computer Science and Information Technology | CGPA : 8.11/10*

Greater Noida, India

*June 2019 – June 2023*

## EXPERIENCE

---

### Netprophets Cyberwork Pvt Ltd

*Software Engineer*

January 2023 – April 2024

*India*

#### EMA - Epilepsy Management Aid

- Ensured **responsive UI** implementation. Made UI changes in existing project.
- Designed and implemented **APIs** to efficiently handle various system functionalities.
- Coordinated with team lead and seniors to fix bugs and problems.
- Implemented **Localization** in the project.
- **Tech Used:** HTML | SCSS | Typescript | Angular | Angular Material | Git

#### Digicel

- Developed dynamic and interactive web applications using Angular framework.
- Utilized Angular services components and modules to create modular maintainable code.
- Integrated **Backend API** to fetch and display data in frontend.
- Implemented **Library based modules** in angular to maintain reusability of feature modules.
- **Tech Used:** HTML | SCSS | Typescript | Angular | PrimeNg | Git

#### ETA - Epilepsy Treatment Aid

- Implemented **lazy loading** and other techniques to improve initial page load times.
- Write **unit test cases** for the feature that is implemented to ensure code quality.
- Implemented and maintained UI design.
- Investigate and resolve bugs reported by QA
- **Tech Used:** HTML | SCSS | Typescript | Angular | Angular Material | Git

#### PGI - Performance Grading Index

- Work closely with team to understand and prioritize incoming change requests.
- Communicate with team members to provide updates on progress of changes.
- Monitor and assess bug reports from users or QA to maintain a stable and error-free application.
- **Tech Used:** HTML | Tailwind | React | Git | Redux

#### ACTC

- Used **Redux** for state management
- Created UI and implemented APIs.
- Fixed bugs.
- **Tech Used:** HTML | React | Redux | SVN Tortoise

## TECHNICAL SKILLS

---

**Web Technologies/ Frameworks:** HTML,CSS, SCSS, Bootstrap, Javascript, Typescript, Angular, Angular Material, UIKit, PrimeNg, ReactJS, TailwindCSS

**Languages:** C/C++, Java

**Application tools:** IDE (Visual Studio Code)

Rest API Integration, Git, Jira

**Soft Skills:** Communication ,Team Work, Time Management, Adaptability

## PROJECTS

---

### **Food App** | *ReactJS, Tailwind , Redux* | GitHub

- This project is a frontend food ordering application developed using ReactJS. The application is designed to showcase restaurant cards, each displaying its menu, and allows users to add items from any restaurant to a shopping cart. Users can also manage the cart by adding or removing items and clearing the entire cart. The application leverages React Components, React Hooks, Routing, and state management through Redux.

### **Netflix GPT** | *ReactJS, TailwindCSS, OpenAI, Firebase* | GitHub

- This mini project is a sophisticated Netflix-like application designed to offer users an engaging and personalized movie browsing experience. Built using ReactJS, the app showcases a dynamic and visually appealing UI, incorporating features such as a movie recommendation system, multi-language support, and real-time user authentication.
