Github Links:
https://github.com/Thecodechronicles/WeatherApp.git (Node and Express)
https://github.com/Thecodechronicles/React_Indecision_App.git (React)
https://github.com/Thecodechronicles/React_Expensify_App.git (React with redux)

Hobbies:
Exercise, Listening to Podcasts, Cleaning my surroundings, Exploring ways to setup my work enviorment which can be productive and provide serenity.

Side note:
Above mentioned git repos are work done during a period of 'July 2022 – March 23'. A small family business kept me busy which eventually didn't workout. A period of re-learning and self improvement followed thereafter. Looking for a chance to foster again.

I, Ankit Mittal, hereby affirm that the afrementioned details are true to the best of my knowledge.
