NISHAT ALAM

mdnishat.alam1998@gmail.com | +91-6283187985 | [Linkedin] | [Github] | [HackerRank]

Skills

Java | Spring Boot | Hibernate | J2EE | Microservices | HTML | CSS | JavaScript | React.js. | MySQL.

Work Experience

DDIS Technologies – Software Developer (11 months)

Payment System

- We seamlessly integrated third-party provider like Trustly to provide customers with a convenient payment option. This integration was essential to expand our payment offerings and cater to a wider audience.
- Responsible for debugging, fixing the bugs, writing test cases preparing unit testing.
- Involved in developing the web pages interfaces using HTML, CSS, Javascript, and React.js.
- I am good expertise in Exception Handling, Collection Framework, Multithreading, Java 8.
- Used Spring Boot serves as a cornerstone in our Microservices architecture, offering benefits like rapid development, simplified deployment, and auto-configuration.

Projects

Guess the word (Personal Project)

A website built on using Java, Spring Boot, HTML, Thymeleaf, MySQL.
- User can guess the letter to complete the hidden word**.**
- At a time user can get maximum 5 chance to complete the guessed word.

Quiz App (Personal Project)

For Quiz App website I have used JSX, CSS, Javascript, React.js.
- User will get four options in which they have to select the correct answer.
- Every user will get five question, and score will display after completing the quiz.
