Expense Tracker
Web Application

Expense Tracker allows user to track their expenses and premium users can get extra benefits like provision to download their expense in an excel format and change theme feature. Users expenses data is protected using authentication method.
Frontend: HTML, CSS, JS, ReactJS.
Used firebase for authentication and real-time data for storage

🔗 https://expensetracker-project2.netlify.app

Mail Box Client
Web Application

Mailbox client is an application where users can send and receive mail. Each user has their own account and users cannot access other users data.
Frontend - HTML, CSS, Javascript, React, Redux
Implemented GET/POST/PUT requests to firebase in order to retrieve user-specific information for each user.

🔗 https://mailbox-client-project4.netlify.app

Restaurant App
Web Application

The project displays a menu of food items.Users can easily browse through the menu to choose their desired items. Users can add items to their cart.The cart dynamically updates to show the added items along with the total price. Users can also adjust the quantity of items in the cart or remove items if needed.
Frontend: HTML, CSS, JS, ReactJS.
