Work Experience

Cha-Chi Communication, Gurgaon Jan'24 – April'24

Software Developer Engineer

Worked on the frontend and backend on the application along with PostgreSQL database for building application. Built APIs for Authentication and CRUD operations using Node.js and Express js. Used multer for image uploading and integrated JWT token for authentication. **Tech stack - typescript, React, NodeJS, ExpressJs, PostgreSQL.**

Apna College, Remote May'24 – Present

Teaching Assistant – Data Structure and Algorithms

Working as a Teaching Assistant at Apna College, I am mentoring approximately 3000 students, solving their doubts related to Data Structures and Algorithms and helping them understand complex topics. Involved in groups discussions and leaded the discussion and solved student queries. **Skills Required – Teaching, Data Structure and Algorithms, Programming Languages, Problem solving, communication.**

UPL Limited Ltd. - Hybrid Aug'23 – Aug'23

Frontend Developer

Contributed to the frontend development of a web application using React, implementing components and features to enhance functionality and visual appeal. Collaborated effectively with the team for contribution. Gained valuable experience in React development. **Technology Used - ReactJS, JavaScript.**

Project Work

Personal Portfolio website: Developed a personal portfolio project to showcase professional experience, achievements, contributions, skills, and projects. It is fully functional and responsive for all devices. Implemented dark and light themes, with a feature that saves the chosen theme on browser refresh, enhancing user experience.

Technology used - React, JavaScript, git, GitHub

Malhaar'23: Led a team of 15 developers in developing the website for Malhaar'23, our college cultural fest. Utilized React and JavaScript technologies to build the website, integrating details about fest events, sponsors, team members and superstar etc. The website is fully functional and responsive for all devices.

Technology Used –JavaScript and ReactJs.
