Education

Government College of Engineering, Karad
Bachelors in Information Technology CGPA 8.28
2020-2024

B. G. P. Sahyadri Jr. College, Sangamner
Intermediate (XII)   Percentage 82.00

S. S. B. Thorat Vidyalaya, Panodi
Matriculation (X)   Percentage 91.60

Projects

Leaf Disease Detection and Classification

Machine Learning | Python | CNN

Advanced leaf disease technology using ML algorithms to accurately identify and classify various plant diseases.

Achieved an impressive accuracy rate of 93%

It improve early detection and provides actionable insights for effective leaf disease management and crop protection

Github.com://Leaf-Disease-Detection

Supermarket Billing System
C++ | OOP

The desktop based application made for the superstore which mainly focuses on the calculation of products purchased by the customer during the specified time and the money to be paid by the customer.

Github.com://Supermarket-billing-system

Internship

Zenox Technologies   2021

Learned the various concepts of **C++ language** and **Object Oriented Programming** in this placement based program

Technical Skills

C | C++ | Python | HTML

CSS | SQL | mongoDB | Git

Coursework

Database Management System
Data Structures and algorithms
Object Oriented Programming
Computer Networks
Operating System

Certifications

Python for beginners- Learn all the basics of python (2022)

Live Programming with JavaScript

(2021)
