2017

Jodhpur, Rajasthan

SKILLS

HTML5

CSS3

JavaScript

React Js

Redux

Responsive Design

Git/Github

REST API

Data Structures

OOPs

Web Development

Bootstrap

PROJECTS

Tour and Travel Website

- Developed an online transportation system website that allows users to log in and book vehicles quickly and easily.
- All user data, including information about booked vehicles and user details, is securely stored, and we included a dedicated project section where users can access their transportation history with a heading and description of each booking.
- Applied Object Oriented Programming principles to develop scalable and modular web applications, resulting in improved code reusability and maintainability.
- Technology:** React, SCSS, AWS.

Job Portal

- Created an online platform where a user can log in/signup as a recruiter as well as a candidate.
- Recruiters can post jobs and see the details of the candidates who applied for that job. Candidates can view and can apply for the jobs.
- Implemented robust security measures, session management, and best development practices, ensuring the integrity and confidentiality of user data.
- Technology:** React, Redux, SCSS.

Disney Clone

- Developed a Disney Clone web application that allows users login, and explore a variety of Disney-related content.
- Integrated Firebase authentication to enable secure user login and data storage.
- Employed React Router to enable navigation between different sections of the application.
- Technology:** React, Redux, Firebase, Styled Component.
