OBJECTVE

To obtain a software testing role where I can utilize my strong sense for quality and detail, team management, planning and problem-solving skills to contribute to the development of high-quality software products.
Fresher at software testing. Internship in manual testing and certified in test automation with Selenium (Java). Lateral experience in quality management, team handling, planning and delivery of civil construction projects.

KEY PROJECTS

Manual Testing Project

- ePOS Wine Shop, Rajasthan Government
  CRM application for the Rajasthan government to maintain wine shop details and track the purchase and sales of different types of alcohol products.
  Modules tested: CRM and sales reporting.
  Key responsibilities included smoke testing, regression testing, functional testing and integration testing. Bug detection and classification based on severity and priority. Adhering to Agile processes- attending daily scrum calls.

Automation Testing Project

- Personal project (as part of Selenium w/ Java certification) to automate test cases for website login, navigation and functionality.
- Wrote selenium scripts to test – login functionality, tab navigation, site navigation through links, alerts, dropdowns, date pickers, form filling, submission, and result page.

KEY SKILLS & STRENGTHS

- Manual Software testing
- Selenium Webdriver w/ Java
- TestNG, Maven
- SQL, Postgres
- Postman
- Agile, Jira

- Team Management
- Planning and delivery
- Client engagement
- Self driven and task oriented
- Highly organized

CERTIFICATIONS

- Selenium Certification Course, Intellipaat
